The Electrode Company

The Lightman® micro spectrometer elicits interest at the ORM Club Meeting

The Electrode Company Ltd specialises in non-invasive monitoring, optical sensors and high performance pulse oximetry. The company recently demonstrated their innovative Lightman® micro spectrometer SpO₂ sensor tester at the ORM Club annual meeting - Medical FIG, held on 29th June.

In one of the key sessions of the day, Dr Geoff Mathews of The Electrode Company, presented on the key importance of SpO₂ sensor testing. Commenting on the meeting Geoff Mathews said: "This fascinating meeting offered us an ideal opportunity to showcase our Lightman® sensor tester to key professionals in the medical arena. In addition the level of interest generated at the meeting underlined the real need for SpO₂ sensor testing throughout the UK and indeed, the world."
